

# Do You Need New Forks?

**We Can Source Parts for Any Make and Model.**

If the wear reaches 10% it should be replaced. Just 10% wear decreases the capacity of the lift truck by 20%. OSHA requires that a fork that shows any of the following defects shall be withdrawn from service and discarded or properly repaired:

- Fork shows surface cracks.
- Fork hooks show wear.
- The fork markings are not legible.
- Blade or shank are not straight.
- The fork angle from blade to shank is not straight.
